**Invited Speaker – PSRC8 The 8<sup>th</sup> Pacific Symposium on Radical Chemistry 18-22 July 2017, Brisbane | Australia**

Professor Prof. Ning **Jiao**  
State Key Laboratory of Natural and Biomimetic Drugs,  
School of Pharmaceutical Sciences,  
Peking University, 100191 Beijing,  
P. R. China

Dear Prof. Jiao,

As Chair of the Organising Committee for PSRC8 (the 8th Pacific Symposium on Radical Chemistry), it is my great pleasure to invite you to present a lecture on your work at the Symposium, which is to be held in Brisbane, Australia from the 18<sup>th</sup> - 22<sup>nd</sup> July, 2017.

This Symposium will focus on new research discoveries by synthetic and materials chemists who use radicals as reactive intermediates to initiate synthetic transformations, in polymerisations and in surface modifications; as well as explore the role of free radicals in redox biology and as biological antioxidants. In this regard, leading researchers from more than 10 countries will describe work impacting on new cleaner and more efficient synthetic processes, new cutting-edge, light-weight and novel materials, as well as studies on understanding the fundamental nature of radicals and the processes in which they are involved. Physical organic chemistry and high-level computational calculations will underpin much of this work and the chemistry presented will impact broadly across many areas of materials science, physics, biology and medicine.

Clearly your work will make a valuable contribution to this program in a number of areas and so therefore I hope you will agree to make a presentation of your latest results at the Symposium.

At this stage, budget constraints mean the Symposium is unable to offer any financial support towards your attendance. However as the Symposium promises to be an exciting and important opportunity to both present your latest results, as well as network with your colleagues in the field, I think you will agree that PSRC8 will be a very valuable meeting and certainly well worth your participation.

On behalf of the PSRC8 Organising Committee, we would like to thank you for considering this invitation and we hope you will be able to accept this offer to speak at this important meeting.

Looking forward to your response,

Professor Steven E. **Bottle**  
Chair  
PSRC8  
8th Pacific Symposium on Radical Chemistry  
17-22 July 2017  
Brisbane,  
Australia.
