Dear Prof. Ma:

It is my great pleasure to invite you to visit The Scripps Research Institute (TSRI), Jupiter, Florida, between January 18 and 21, 2018. You are going to give a lecture about your current research, meet with faculty members, graduate students, and postdocs, visit our campus, and discuss about collaboration opportunities. We will cover your local accommodation for the duration of your stay.

TSRI is world leader in biomedical research, expanding the frontier of knowledge, accelerating new treatments for disease, and training the next generation of scientists in this critical area of studies. I am confident that you will find TSRI a great institute for scientific innovation and collaboration.

My colleague and I look forward to seeing you here in Jupiter.

Sincerely,

Ben Shen, Ph.D.
